Why have human beings not always lived as God has wanted them to and what are the effects of this on human beings and the environment?

Hear

The Genesis account of Creation and Fall is not a literal scientific description, but expresses beliefs about God, the world, and human beings.

Key Texts

- Genesis 2:5-10, 15-23, 3:1-7,9-13, 17-19) - The second account of Creation
- John 1:1-5, 16-18 - The Word of Life
- The Nicene Creed
- Laudato Si' 66-67

Live

Many scientists are Christians and do not see any conflict between faith and science.

- A scientist can study how the universe works, while faith helps answer why it exists.
- Many Christians believe God created the universe and that science helps us understand His creation.
- Catholics believe that faith and reason work together.

 Gregor Mendel, a Catholic monk, helped us understand genetics through his experiments with pea plants.

 Georges Lemaître, a Catholic priest, developed the idea that became known as the Big Bang Theory.

Believe

 The world is in disarray because humans choose to do evil repeatedly. This is called original sin; the story of Adam and Eve explains why the world is no longer as good as it was in the beginning.

 In Jesus, God restored humanity's relationship with Him.

 Baptism is the first sacrament of the forgiveness of sins. It unites Christians with Jesus Christ, who dies and rises, and strengthens the gifts of the Holy Spirit.

 Belief in God as sustainer and source of the universe is compatible with the scientific account of the beginnings of the universe and the theory of evolution.

Celebrate

The symbols in the Sacrament of Baptism point to a Christian's new life in Christ.

 Water – washes away sin and brings new life.

 Dove – the Holy Spirit.

 Candle – the light of Christ.

 Cross – belonging to Jesus.

 Holy Oils – being anointed and strengthened by God.

 White Garment – purity and new life in Christ.

The Church teaches that the Nicene Creed allows all believers to make a common statement of their faith.
